A3 Communications Named 17th Fastest Growing Systems Integrator In America By SD&I Magazine

COLUMBIA, SC (March 5, 2013) — A3 Communications, with offices in Columbia, Greenville, Charleston and Atlanta, was recently recognized as one of America's fastest growing systems integrators by SD&I magazine.

Including public and private companies of all sizes, SD&I's "Fast50" program chronicles America's fastest growing security system integrators and their best practices. With a ranking of 17 out of 50, A3 Communications proved that they were not just growing quickly, but have developed strong niche markets and achieved substantial increases in gross revenues for three consecutive years.

"It's an honor to be recognized as one of America's fastest growing systems integrators. We work hard to provide our customers with complete security solutions, including IP video surveillance and access control. Not only are we interested in providing our customers with turnkey solutions, but also interested in keeping our communities safer," said Brian Thomas, President of A3 Communications.

Over the last three years, A3 Communications has had an average growth of 41.4%. All companies listed on SD&I's Fast 50 list were recognized and ranked based on percentage and revenue growth. The rankings are also balanced by studying numerous years of financial information, to ensure that high-growth companies are not just "flash in the pan" types of businesses.

Thomas closed with "We feel confident that we'll continue to grow for years to come."
